Ultrasonic cleaning devices

Elmasonic EASY

The easy way to clean.

- More power with Pulse-function for mineral soiling and polishing pastes
- Visual limit temperature warning to protect sensitive parts
- Easy handling with safety shutdown for more user safety

Elmasonic EASY

Superior cleaning technology

The Elmasonic EASY series includes 9 units of different sizes and is characterized by simple, user-friendly operation. With 100 % ultrasonic power at a **frequency of 37 kHz**, the Pulse-function and visual warning (when bath temperature reaches the set limit), the Elmasonic EASY solves typical cleaning tasks quickly and efficiently.

The activatable Pulse-function is suited to remove tenacious, mineral soiling and polishing pastes. The ultrasonic power is

increased up to 20 %, so that any soiling will be removed easily and quickly.

The limit temperature can be adjusted according to individual requirements. When the set temperature limit is reached the unit gives out a visual warning that helps to prevent the coagulation of proteins and protects sensitive items from damage due to high temperatures.

Comparison of Sweep and Pulse effects

The **permanently integrated Sweep-function** ensures an even sound field distribution and therefore an even removal of soiling. Ideal for fats, oils and pigments, as these are rapidly dissolved in the cleaning solution.

The **adjustable Pulse-function** increases the ultrasonic peak power. The ultrasonic impacts infiltrate the soiling which then flakes off. Ideally for hard, encrusted dirt such as plaster and polishing pastes. In addition, the cleaning effect is up to 20 % faster visible.

Application examples before and after cleaning

Jewellery chain

Removal of polishing pastes

Flange

Removal of grease and silicone

Impression Tray

Removal of alginate / impressive mass

Elmasonic EASY in the dental laboratory

Elmasonic EASY in the chemical analysis laboratory

Elmasonic EASY

Ultrasonic cleaning devices with 100 % ultrasonic power

The Elmasonic EASY units are available in 9 different sizes, all with stainless-steel casing. They are equipped with higher unit feet, which improves the protection of the electronics against splashwater. From the EASY 30 H upwards the units are equipped with a heating and from the EASY 60 H upwards they have drain duct on the rear.

Accessories

The extensive accessories programme includes cooling coils, noise protection boxes and various baskets, holders and brackets.

Thus Elmasonic EASY ultrasonic units can be used to clean jewellery and watch parts, laboratory instruments, dental lab instruments or industrial parts.

Drying units Elmadry TD, cleaning baskets in different dimensions and with different mesh sizes: 7x1mm, 9x1mm or 16x1.2mm; ring holder, clamping devices for watch straps, etc.

Hostalen- and acid resistant plastic tubs, test tub or tool holders, clamps and immersion baskets

Noise protection boxes in 2 different sizes to reduce noise up to 75 %

Cooling coils, glass beakers, covers with holes to insert glass beakers, etc.
